Practical and Political Approaches to Recontextualizing Social Work

Protecting and Promoting Client Rights

Examines the inherent tensions within the family assessor role when there is no overarching compulsory regulatory body in social work. The book highlights why it is necessary to understand how social workers adhere to social work standards of practice within a family assessor role (AASW, 2018). It explores how social workers who undertake the role of forensic family assessors can meet the expected AASW Standards of Practice while also protecting and promoting the rights of their family court clients. Presents the qualifications, training, tools and processes used by family assessors Examines the challenges social workers encounter when applying the standards for practice, including application of knowledge to practice, values, ethics and professionalism Focuses on the roles of social work professionals within a forensic family law context It has been over thirty years since the founding crises that birthed legal ethics as both a field of study and a discrete field of law. In that time thinking about the ethical dimension of legal practice has taken several turns: from justifications of zealous advocacy, to questions of process and connections to specifically legal values, to more recently consideration of legal conduct as part of a wider field of virtue. Parallel to this dynamism of thought, there has also been significant changes in how legal professions, especially within those that possess a common law heritage, have been regulated and the values and conceptions of legitimate conduct that has informed this regulation. This volume represents an opportunity for a comprehensive review of legal ethics as an international movement. Contributors include many of the key participants to the legal ethics field from the United States, United Kingdom, Canada, Australia, New Zealand and South Africa, including David Luban and Deborah Rhode, as well as many of the recognised emerging thinkers. The theme of the book is taking stock of the last thirty years of legal ethics practice and scholarship and
also a forum for new ideas and new thinking regarding the conduct of lawyers and the moral and social responsibility of the legal profession. The contributions also consider the topic of dynamism. Over the last decade significant developments in both the expectations of professional conduct and the regulation of the profession has been experienced in all jurisdictions, which has seen traditional, and once sacred, conceptions of lawyering challenged and re-evaluated. The contributors also look at the theme of affirmation. Within an increasingly complex environment of change and dynamism, this volume reaffirms that there is value within the field of legal ethics. That is the project of reflecting on the unique ethical and conduct requirements of lawyering can not be submerged into a broader field of applied philosophy, management or regulatory studies. While this volume does not deny the opportunities that exist for interdisciplinary engagement with philosophy, social science or politics, it affirms legal ethics as a legitimate and highly relevant field of inquiry.

Frankl's Man's Search for Meaning sold over 10 million copies and was translated into over 30 languages and was deemed by a survey of the Library of Congress one of “the ten most influential books in America”. This volume introduces and presents translations of a number of important but less well-known writings by Viktor Frankl, translated from the original German, in which he forthrightly relates psychology to religious concepts. These cast a strong, new light on the generally received understanding of Frankl’s contribution to psychology – “logotherapy” – and its relationship to the soul and universal ethics.

The Elements of Applied Psychological Practice in Australia is a comprehensive and applied review of material required for basic psychological practice in Australia. This book is the first of its kind to offer a one-step resource to success in the Australian National Psychology Examination. Nadine Pelling and Lorelle Burton have provided you with everything you need and more, most notably: • A comprehensive review of applied areas and all assessments noted as important by the Psychology Board of Australia • Study skills and tips, including ‘making a study plan’ and how to manage your time • 100 sample Multiple Choice Questions (MCQ) with answers and explanations. For anyone looking to take the Australian National Psychology Examination, this detailed, concise, and extremely easy to read book is an absolute must-have. Beginning-level and experienced psychologists will also find the comprehensive coverage of applied practice areas a useful reference for their client-related work, and its value as a resource comes alive with its succinct presentation of client-based psychological assessment and the ethics of applied practice and interventions. This book will also be of interest to teachers of psychology and international psychologists and scholars who may be interested in how psychology is practiced in Australia.

Currently there is an enduring and changing meaning of social work in a world where new crises are being confronted and new opportunities are arriving in the evolving context of social work and the related disciplines. There is a question on how to manage the
transformation of social work both productively and creatively during this global shift. Practitioners and educators can experience a tragic
disorientation when confronted by the diversity and depth of these crises endured and can face doubts about their role in social work throughout all
these changes and difficult situations. Alternatives to this disorientation, a comfort with uncertainty, and a capability to take risks need to urgently
be developed on a professional and personal level for success in the evolving field. Through historical lens and a review of policies and value-based
approaches, the recontextualization of social work can be explored. Practical and Political Approaches to Recontextualizing Social Work explores
practical and political ways in which social work practice has been reconstructed. Chapters identify this recontextualization of social work and how
it is changing, adapting, and transforming the profession along with providing the potential implications for the profession. This book grants insight
on the reconstruction of social work on the personal and interpersonal level (“case” work) and also on those intending to impact social work on the
local/global environment level in all dimensions: politically, economically, socially, and ecologically. In addition, the book includes a shift from the
present short-term and micro/personal view to a future and much broader and encompassing perspective and practice vision. This book is essential
for social workers, practitioners, policymakers, government officials, researchers, academicians, and students who want to learn more about the
recontextualizing of modern social work in a shifting global environment.

The eighth edition of best-selling AN INTRODUCTION TO HUMAN SERVICES offers a uniquely practical and comprehensive introduction to the human services profession. Drawing on the authors' extensive experience as practitioners, educators, and researchers, the text defines human services, reviews the historical development of the field, provides a solid
grounding in such fundamental concepts as serving the whole person, using an interdisciplinary approach, interacting with helper and client,
preparing generalists, and empowering clients. Every chapter includes detailed case studies to highlight the practical applications of key concepts
and prepare students to effectively address issues they are likely to encounter as helping professionals. Important Notice: Media content referenced

An innovative textbook setting out a systematic approach to business and human rights. This book explores the moral lives of mental health clinicians serving the most marginalized individuals in the US healthcare system. Drawing on years of fieldwork in a community psychiatry outreach team, Brodwin traces the ethical dilemmas and
everyday struggles of front line providers. On the street, in staff room debates, or in private confessions, these psychiatrists and social workers
confront ongoing challenges to their self-image as competent and compassionate advocates. At times they openly question the coercion and forced-
dependency built into the current system of care. At other times they justify their use of extreme power in the face of loud opposition from clients.
This in-depth study exposes the fault lines in today’s community psychiatry. It shows how people working deep inside the system struggle to
maintain their ideals and manage a chronic sense of futility. Their commentaries about the obligatory and the forbidden also suggest ways to bridge
formal bioethics and the realities of mental health practice. The experiences of these clinicians pose a single overarching question: how should we
bear responsibility for the most vulnerable among us? Ethics is an increasingly important theme in social work practice. Worldwide, social workers
experience common ethical challenges (how to be fair, whether to break a rule, how to act in politically tense situations) in very different contexts –
from disaster relief in China to child protection work in Palestine. This book takes as its starting point real life cases featuring ethical problems in the
areas of: negotiating roles and boundaries, respecting rights, being fair, challenging and developing organisations and working with policy and
politics. Each case opens with a brief introduction, is followed by two commentaries and ends with questions for reflection. The commentaries,
written by authors from different countries, refer to relevant theories, concepts, practical matters, alternative courses of action and their
implications. Features within the book include: An introductory chapter covering issues of global ethics Cases and commentaries drawn from across the world – from Peru to Finland Cases based on real life situations and chapter introductions from leading authorities in social work and ethical theory Questions and practical exercises to aid teaching and professional development This book is a unique and accessible resource for stimulating ethical reflection, expanding ethical horizons and developing ethical and intercultural sensitivity. It is designed for use by undergraduate and postgraduate students and professionals in the fields of social work, social education/pedagogy, social care work, international social work, community development, community organisation, youth work and related fields. This study addresses the legal rights, obligations, and responsibilities of human service workers and to a lesser extent, some areas of substantive human service client-related law. This book aims to introduce concrete and innovative proposals for a holistic approach to supranational human rights justice through a hands-on legal exercise: the rewriting of decisions of supranational human rights monitoring bodies. The contributing scholars have thus redrafted crucial passages of landmark human rights judgments and decisions, ‘as if human rights law were really one’, borrowing or taking inspiration from developments and interpretations throughout the whole multi-layered human rights protection system. In addition to the rewriting exercise, the contributors have outlined the methodology and/or theoretical framework that guided their approaches and explain how human rights monitoring bodies may adopt an integrated approach to human rights law. This unique text, developed by the author with the help of his students at Nova Scotia Community College, provides an overview of the field of helping, discussion of the field’s 12 major theories and corresponding techniques with a special focus on helping readers develop their own counseling style or orientation. After reviewing and applying the content, readers decide what theory or combination of theories and techniques resonate for them. Jonathan Herring provides a clear and engaging overview of legal ethics, highlighting the ethical issues surrounding professional conduct and raising interesting questions about how lawyers act and what their role entails. Key topics, such as confidentiality and fees, are covered with references throughout to the professional codes of conduct. Machines and computers are becoming increasingly sophisticated and self-sustaining. As we integrate such technologies into our daily lives, questions concerning moral integrity and best practices arise. A changing world requires renegotiating our current set of standards. Without best practices to guide interaction and use with these complex machines, interaction with them will turn disastrous. Machine Law, Ethics, and Morality in the Age of Artificial Intelligence is a collection of innovative research that presents holistic and transdisciplinary approaches to the field of machine ethics and morality and offers up-to-date and state-of-the-art perspectives on the advancement of definitions, terms, policies, philosophies, and relevant determinants related to human-machine ethics. The book encompasses theory and practice sections for each topical component of important areas of human-machine ethics both in existence today and prospective for the future. While highlighting a broad range of topics including facial recognition, health and medicine, and privacy and security, this book is ideally designed for ethicists, philosophers, scientists, lawyers, politicians, government lawmakers, researchers, academicians, and students. It is of special interest to decision- and policy-makers concerned with the identification and adoption of human-machine ethics initiatives, leading to needed policy adoption and reform for human-machine entities, their technologies, and their societal and legal obligations. Discover how to interpret today’s news and analytically consider current legal and ethical issues with Jennings’ BUSINESS: ITS LEGAL, ETHICAL, AND GLOBAL ENVIRONMENT, 12E. Work within the human services is increasingly influenced by rights-based thinking, and this book offers advice for the practitioner on how to translate abstract rights theory into their everyday practice. The book outlines the theory that underpins human rights and outlines the ethical debates and dilemmas that frequently surround them. It also provides a practical model that outlines how to embed human rights theory within practice and the professional decision-making process. Drawing extensively on real-life case examples, the book includes chapters on rights-based work with different client groups including offenders, people with intellectual disabilities, immigrants and refugees, and children and families. This important book will be a useful source of guidance and advice for professionals working across the human services, including those in social care, health and justice settings. This practical text equips students with the fundamental information and skills needed to be effective case managers, covering such central issues as the responsibilities of case management, competencies needed for ethical and multicultural case management, participation in interdisciplinary and interorganizational teams, and engagement in advocacy and leadership. The first-person experience of a client and her case managers draws students into the text. To ensure that the book offers current and accurate information, the authors interviewed human service case managers nationwide about their jobs, skills, challenges, and clients. These interviews, combined with current research and numerous case studies, make GENERALIST CASE MANAGEMENT: A METHOD OF HUMAN SERVICE DELIVERY, 5th Edition, realistic and relevant. The text also aligns with NASW case management standards and helps to prepare students for earning C-SWMC certification and the HS-BCP credential. The Elements of Ethical Dilemmas: Applied Psychology Ethics in Australia is a comprehensive and applied guide to practising psychology in an ethical and professional manner. This book is designed to assist applicants for general registration as a psychologist successfully navigate one of the eight core competencies for general registration set by the Psychology Board of Australia; specifically ethical, legal, and professional matters. The exploration of ethical dilemmas is a core task for the 4+2 pathway to general registration, while related ethical applications require exploration in the 5+1 and higher education pathways to registration as well. This book will teach readers how to identify, explore, and choose the appropriate professional course of action when confronted by ethical dilemmas in practice. The chapters include personal reflections from expert contributors relating to each of the ethical dilemmas, expertly highlighting clients' and stakeholders' circumstances, ethical codes and guidelines, scholarship and research, as well as other key elements in the ethical decision-making process. Especially relevant to those applying to become a registered psychologist in Australia, this book offers invaluable guidance on responding to ethical dilemmas as required by the Psychology Board of Australia in various pathways to general registration. In their day-to-day practice, social work and human services practitioners frequently find themselves in confusing ethical quandaries, trying to balance the numerous competing interests of protecting children from harm and promoting family and community capacity. This book explores the ethical issues surrounding child protection interventions and offers a process-oriented approach to ethical practice and decision making in child protection and family welfare practice. Its aim is to prepare students and early-career professionals for roles in the complex and challenging work of child protection and family support. Beginning with a critical analysis and appreciation of the diverse organisational and cultural contexts of contemporary child protection and ethical decision-making frameworks, the authors outline a practical ‘real-world’ model for reshaping frontline ethical practice. Moving away from a focus on the child apart from the family, the authors recognise
that child safeguarding affects the lives, not just of children, but also of parents, grandparents and communities. Working Ethically in Child Protection eschews dominant rational-technical models for relational ones that are value centred and focus on family well-being as a whole. Rather than a single focus on assessing risk and diagnosing deficit, this book recognises that our child protection systems bear down disproportionately on those from disadvantaged and marginalised communities and argues that what is needed is real support and practical assistance for poor and vulnerable parents and children. It uses real-world case examples to illustrate the relevant ethical and practice principles, and ways in which students and practitioners can practise ethically when dealing with complex, multi-faceted issues.

Integrating Human Service Law and Practice assists human service students and workers in understanding their legal rights, obligations, and responsibilities, as well as familiarising them with some areas of substantive law relevant to human service delivery. 'Key Points for Practice' and 'Practice Questions and Responses' demonstrate the application of legal issues in professional practice. With an emphasis on the decision-making of human-service workers, this book aims to help students gain an understanding of the law which enables them to get the best outcomes for themselves and their clients. Students will be able to challenge the law knowledgeably, if appropriate, to pursue a social justice agenda. Throughout the book, the potential for positive interaction between legal imperatives and quality practice is reiterated.

The human services are established to support the most vulnerable and marginalised people in our society. Yet media and other reports frequently highlight a disturbing picture of industry failures, malpractice and abuse. This book addresses the response of legal and quasi-legal bodies to human service failures. It outlines those areas of law which are most likely to be activated by human service shortcomings, and those aspects of direct human service delivery which are most likely to attract legal attention. Essential reading for those studying or working in human services and social work, this book is designed to alert people to the legal risks arising as a result of inadequate human service delivery.

News: this book has been included as one of the texts for the National Psychology Examination - Curriculum Domains 1 (Ethics) and 4 (Communication), developed by the Psychology Board of Australia.

This book targets a wide range of allied health professions. The list, while not exhaustive, embraces occupational therapy, podiatry, Chinese medicine, complementary medicine, nuclear medicine, speech pathology, radiography, physiotherapy, psychology, osteopathy, chiropractic care and optometry. The authors explain the legal context in which these professions function, the various forms of legal regulation which apply to them, their legal liabilities, and legal imperatives which bear upon their practice. Also included is commentary on the limits and ambiguities of law in relation to allied health activity, the interaction between law and professional ethics, and some significant legal challenges in normal professional life. Allied Health Professionals and the Law expands the legal knowledge of allied health readers whether they are practitioners seeking to understand the legal aspects of their work or researchers engaged in analysis of professional matters which have legal dimensions and implications.

Summary: Written by two of the authors from University of Sydney, NSW; this work covers practice skills used in social work and other human service professions across a variety of contexts. The answers we need to lead strong and healthy lives can be found within ourselves. In Awakening the Conscious Cell, author Jen Sackley shows you how to gain an understanding of yourself in order to pave the way for that satisfying life. She introduces the concept of concellogy, which she defines as a practice of combining your essence and energy to achieve and succeed. In Awakening the Conscious Cell, she discusses how knowing how to create a pathway to your inner intelligence is twofold. First, its accepting that as people we are of two mindsconscious and subconscious. Second, the right of entry to the answers of life is made possible by holding tension between the two. Awakening the Conscious Cell is not only a journey of how you were created but rather how you operate as a human. It not only raises your conscious state, it gives you the opportunity to rewrite your scripts by your life choices. Through the practice of concellogy you can raise your level of self awareness and embrace a pathway to integration.
the End of Life is the last volume in a trilogy on Aging conceived for the International Library of Ethics, Law, and the New Medicine. Leading scholars from a range of disciplines examine some of the most emotive topics in the study of aging: assessing quality of life, improving end-of-life care, palliative care, euthanasia, and consent to research. This chapter explains how to make good decisions.

The concept of reproductive health promises to play a crucial role in improving women's health and rights around the world. It was internationally endorsed by a United Nations conference in 1994, but remains controversial because of the challenge it presents to conservative agencies: it challenges policies of suppressing public discussion on human sexuality and regulating its private expressions. Reproductive Health and Human Rights is designed to equip healthcare providers and administrators to integrate ethical, legal, and human rights principles in protection and promotion of reproductive health, and to inform lawyers and women's health advocates about aspects of medicine and healthcare systems that affect reproduction. Rebecca Cook, Bernard Dickens, and Mahmoud Fathalla, leading international authorities on reproductive medicine, human rights, medical law, and bioethics, integrate their disciplines to provide an accessible but comprehensive introduction to reproductive and sexual health. They analyse fifteen case-studies of recurrent problems, focusing particularly on resource-poor settings. Approaches to resolution are considered at clinical and health system levels. They also consider kinds of social change that would relieve the underlying conditions of reproductive health dilemmas. Supporting the explanatory chapters and case-studies are extensive resources of epidemiological data, human rights documents, and research materials and websites on reproductive and sexual health. In explaining ethics, law, and human rights to healthcare providers and administrators, and reproductive health to lawyers and women's health advocates, the authors explore and illustrate limitations and dysfunctions of prevailing health systems and their legal regulation, but also propose opportunities for reform. They draw on the values and principles of ethics and human rights recognized in national and international legal systems, to guide healthcare providers and administrators, lawyers, governments, and national and international agencies and legal tribunals. Reproductive Health and Human Rights will be an invaluable resource for all those working to improve services and legal protection for women around the world. Updates to this book, and information on translations to French, Spanish, Portuguese, Chinese and Arabic are now available at www.law.utoronto.ca/faculty/cook/ReproductiveHealth.html Integrating Human Service Law, Ethics and Practice introduces students to the legal process and ethical considerations necessary for their understanding of practice within the human services sector. Updated to reflect changes to law and policy, this fourth edition equips students with the information they will need in order to practice within a challenging and dynamic profession. This new edition features law in practice boxes to highlight real-life legal cases of relevance and interest to students alongside key points for practice boxes which help students to see the links between law, ethics and good practice. Professor Dickson provides students with examples of a legal way of thinking about significant issues in social policy. This book can be used in policy and practice courses in the fields of mental health, child welfare, the family, developmental and physical disabilities, and professional ethics. Provides excellent selection of relevant court decisions along with clearly articulated questions and issues for discussion.
